PROBLEM - SOLUTION FIT

The Lease Management System achieves a strong problem–solution fit by addressing manual inefficiencies in managing property leases and tenant information. Through digital automation, it streamlines property registration, lease tracking, payment management, and tenant communication. The solution improves data accuracy, reduces administrative workload, and ensures transparency between property owners and tenants, effectively addressing the operational challenges in lease management.

Purpose

- To automate and streamline lease management operations, reducing manual effort in handling tenants, properties, and payment processes.
- To ensure accurate data handling, efficient lease tracking, and transparent payment

processing using digital tools.

- To enhance user satisfaction through timely payment reminders, transparent communication, and efficient lease handling.
